Work Experience

Software Engineer & Section Leader – RACE, UK Atomic Energy Authority

11/2021 – Today

- Line Management responsibilities including but not limited to:
  - Mentoring
  - Job allocation
  - Annual performance reviews
  - Recruitment.
- Responsible for key software packages for CorteX, RACE's bespoke robotic middleware
  - C++ codebase integration with industry standard frameworks/interfaces such as ROS2, Qt, OPC-UA, EtherCAT.
  - Integration with control hardware and industrial manipulators using proprietary APIs in C, C++, or Python.
  - Comparison and evaluation of web UI technologies versus Qt.
- Acting as a consultant on various RACE's software projects, from architecture design and technologies selection down to the actual development and testing.
- Implementation of key software processes such as:
  - Continuous integration and deployment (Gitlab CI, Docker)
  - Git branching model strategy
  - Agile project management (Lean)

Control Systems Software Engineer – RACE, UK Atomic Energy Authority

12/2017 – 11/2021

- Core member of *CorteX* development team, RACE's bespoke robotic middleware.
  - Cross platform development of key features in modern *C++ (17)* and *Python.*
  - Development of graphical user interfaces (GUIs) using the *Qt* framework (QML & Widgets).
  - Unit testing and performance evaluation using various tools (gTest, QtTest, Valgrind).
  - Translating business requirements to production-ready code.
- Key interface with external stakeholders such as *Nuvia*, *PaR Systems*, *Pixemill*.
- Supervision and mentoring of RACE's year in industry students.
- Assisting with department's recruitment activities.

Web Developer Internship, BubbleAD Ltd

03*/2017 - 06/2017*

- Design and development of company's website using WordPress, HTML, CSS, JavaScript, and PHP.
- Assisting with various IT issues.
- Search engine and security optimizations for the website.
- Collaborating with the marketing intern for website's content management.

Robotics Engineer Internship, Conferience Ltd
10/2016 - 03/2017

- Responsible for the design and development of the updated version of the start-up project Smiley Bin, a smart recycle bin, initially developed by high-school students.
- Requirements capture and hardware procurement for the updated version.
- System design and technology selection for the updated version.
- Electronic system prototyping using the Arduino platform.
- Software development in C programming language.
- Collaborating with the web developer intern to develop the communication module of the system.
- Showcasing the end-product to potential investors.

Qualifications

IELTS Academic Test
20/05/2017

Proficient User - C1 Level (Grade: 7.5 / 10)
Test Report Form Number: 17GR000967XYMM005A

Technological Educational Institute of Chalkida
09/2010 - 05/2017

Bachelor of Science Automation Engineering (Grade: 6.28 / 10)

Key Modules Attended:

Differential and integral calculus
Structured programming
Neural networks & fuzzy logic
Computer architecture & networks
Linear algebra
Object oriented programming
Data structures and databases
Telecommunications systems

Degree Thesis: Home automation system, remotely controlled with voice commands, using the Arduino and Android platforms.

Massive Open Online Courses
Udemy – The Complete Networking Fundamentals Course. Your CCNA start.
Udemy – Design Patterns in Modern C++.
Udemy – Learn Python Programming Masterclass.

Publications
"CorteX: A software framework for interoperable, plug-and-play, distributed robotic systems-of-systems" – Ipek Caliskanelli, Matthew Goodliffe, Craig Whiffin, Michail Xymitoulias, Edward Whittaker, Swapnil Verma, Craig Hickman, Chen Minghao, Robert Skilton.

Organizations
Member of the Institute of Engineering and Technology.
